SEARCHING FOR THE DEAD

FURTHER PARTICULARS OF THE BUFFALO HOLOCAUST.

The Actual Number of Dead Unknown, but Belleved to be Loss Than at First Reported-List of the Dead and Injured, So

Far as Learned-Graphic Descriptions. BUFFALO, N. Y., March 21.-Little can be added to that already known of the result of the disastrons Richmond hotel fire. To the question of "How many are killed?" only an indefinite reply can be made. The number actually known to be dead and julssing is nine, but ten more of the survivors now lodged at the hospitals and at their homes must be looked upon as precarious, and time only will decide whether they are to be numbered with the living or the dead.

The surviving victims, whose names follow In the hospital list, are more or less prostrated by the shock of the disaster, from which some will rally who have vigorous constitutions, But could one see the sufferers swathed in llnt and cotton bandages, moaning with the intense agony of their scorched and calcined flesh, he would number the horrors of the fire at n greater total than the death list. Every one who was burned by the intense heat, if his skin was not actually licked by the flames, has suffered by exposure to' the air after the burning. Before the physicians could dress the wounds they had begun to swell and blister, and in all cases supparation is feared while in many it is inevitable. Some will lose the flesh from their hands and feet, and emputation will be unavoidable. If pyamis does not ensue it will be miraculous.

The critical condition of many victims is therefore alarming and despite the most careful nursing and painstaking surgical attendance several of the hospital patients, it is feared, will die. At present writing it is impossible to guage the fntality of the holocaust, but if no more than twenty it can be hardly less than twelve.

The following are the known dead: Wilson Purcell, a resident broker, formerly

with R. G. Dnn & Company, was killed by jumping; belongs in Canada.

Kate Wolfe, a servant at the Richmond, was found in the ruins of the frame structure destroyed.

Henry B. Rumsey, of New York, died at 1:40 o'clock at the Fifth Avenuo hospital. He was terribly burned, his body being blistered from head to foot. He would have escaped with slight lujurles had he uot gone back to save little Jennie Mann.

The list of missing, who are believed to have perished are as follows:

Mnrk B. Osborne, day clerk at the Richmond. He is supposed to have perished while trying to save the other employes who slept on the upper floors.

Katie Kent, a servant.

Mary Welch, a servant. Her conslu, now at the general hospital, says she saw Mary jump, and that was all.

day. Mail was received for him at the Richmond, where he was to stop. It is not known hether he registered there or not. A telegrain to his home at Scranton elicited the information that he was not there. He may possibly have not reached the city. Otherwise he cannot be accounted for.

Minnie Kelly, a servant. Inquiries at different places in the city have been made in regard to her, but without avail. She probably is lost.

Mr. Johnson, of Toronto, a railroad manwas reported as missing, but his name was removed from the list, as there was some doubt of his being in the hotel.' It is new be-

lieved he was there.

Joseph Sayre, of Erie, Pa.: J. C. Pratt, of Albany. The last named was known to have been at the Richmond, and has not been

heard from since the fire. The following are those at the hospitals and their condition:

At the Sisters hospital: Mary Nolan, servant, badly burned about face, feet, hands and one leg and a portion of the other, and

hair burned to scalp. Very critical. Maggie Mulrach, servant, face, neck and breast burned, arms scorched from shoul ler to finger tips, legs burned from knees to

seriously burned on the face and head.

Mr. E. N. Wimpiner and wife, of New York, had a narrow escape. Said he: 'My wife woke me up, he ving heard the alarm bell, and asked what it meant. It didn't take long to find out Soon we heard the shrieking cries or fire, and springing out of bed we rushed down stairs to the parlor floor. The main stairway was in flames, and we fled into a room fronting on Main street. Fortunately it had a bilcony window, and we climbed out on it. I decided to jump, and taking my wife in my arms, I did so. We were only slightly hunised by the fail. I had on only my trousers and uight clothes. Mr. J. M. Vnn Norman, photographer, living in the wooden building on Main street, said that his family would have been burned up but for the fire alarm arousing them. A man jumpe I on his roof and entered his room. Soon another man jumped. They were considerabry injured, one being unable to walk. They were let out of the front door. "I am positive," said Mr. Van Horman, "that I saw at least three people go through the skylight in the rear of my rooms who never stirred afterward. The bodies will be found in the

Another missing man is — Benedict, brother of Hiram Benedict, of the Buffalo Lubricating Oil company. He arrived here Thursday night and intended stopping at the Richmond. It is thought he came in late and was given a room in the upper story and perished in the flames. A friend here wired Benedict's family but they had heard nothing of his wherenbouts. A message received from Lockport says his family have given him up for lost.

'Mr. Robert H. Stafford, the senior propriefor of the hotel, gives the following account of the origin and progress of the fire, as related to him by his employes. Said he: "As to the origin of the fire, all I can give is from my night man; that is, that the fire started in the cloak-room. There were two pails of water on a shelf on each floor of the elevators, which they used on the fire at the start, but it did not have the effect of putting it out. There was attached one hundred feet of hose. The statement that the water would not run is erroncous. The hose would throw water fifty feet above the building The fire was so near the elevator that it was J. B. He theu rang in alarm to headquarters. While the fire was progressing, guests were making their escape, and many came down the stalewnys. We supposed we had the most perfect arrangement in the case of fire, and 1 think that the Richmond was as safe as any hotel not built fire-proof."

Mr. Stalford strongly condemned the net work of wires that surrounded the hotel which he says prevented the ladders from saving a grent many from the windows, who were otherwise forced to flee through the flames.

The Evening News says: "The story of ruin and desolation needs only the later detalls to make the thrilling chapter complete. Eight persons were killed. Twenty-five were seriously injured. Fifteen were slightly hurt. The ruins have not at this writing been searched. What hidden stories of addltional misery and loss of life those piles of smoking debris will reveal no human Inteligence can foresee. The shaky walls will be thrown down as soon as possible and then the

search will begin." Mr. Louis Zendman, of 29 Lispenard street, New York, one of the survivors, states that when he left his room there were seven per sons in it, and all he saw escape was one man and one woman, It is his belief that the others lost their lives. The body of Heary B. Rimsey, of New York, who died at the hospital this morning, was given in charge of hls brother-in-law, E. C. Edgerton, of Fort Wayne, ind., and a friend, Edwin Mead, Jr., of New York. The deceased was forty-seven years of age and connected with the United States navy. The police are investigating the startling report of a fleudish attempt to burn the Williams block at Virginia and Oak streets, occupied by a dozen different families. It now appears that one of the occupants sent her daughter into the cellar to get a pail of coal about dinner tlue. On the way the child noticed the smell of smoke, and proceeding to the coal bin, found a pile of kindling wood, partly saturated with kerosine, blazing rather briskly among the coals. Sae, with other children who accompanied her, succeeded in putting out the fire, burning their hands quite severely in doing so. The material had apparently been arranged and set ou fire by an lucendlary who could only have committed the deed a few moments before the discovery. There are other runors of similar incendiary, attempts but so far have not been traced to reliable sources.

About a dozen now are at work searching among the hotel ruins for bodles, but none have been found since that supposed to be Osborne. Additional men will be put to

The last body found in the ruins was taken from the site occupied by Utrich & Kingsley's store, about twenty five feet from the front. The remains consisted of a blackened and charred trunk, burned past identification, the jaw being the only part of the head found. A portion of the trousers and under clothing was found by which It is hoped to

identify the remains.

Mr. Arthur Perry, of Welland, Ont., has arrived in the city, looking for his brother, who has not been heard of since the fire. It is thought his remains are in the rains.

A project is on foot here for the erection upon the site of the burned Richmond hotel and St. James hall of a fire proof hotel and a fire proof theater by a popular stock com-pany with a capital of about \$500,000. The project appears to find favor among business men and a general meeting will be called 'at an early date to take action.

Continuous Schools and Continued Teachers.

[Communicated]

We want to enter our solemn protest against districts closing the doors of the school-house when the term paid for by the State is finished. And the reason for this protest will be found in the fullowing consideration of the subject: First the teacher who has taught the public school must be dismissed and his methods of teaching lost on the minds of the pupils before another session begins; and then a new teacher with different methods being introduced into the school, the former methods are forgotten or only remembered to an extent that will cause a collision between the ideas of the new

teacher and the pupils.
Secondly: Both physiology and common sense demonstrate that the blood is determined to that part of the body which is under constant exercise. Ask the blacksmith why his right arm is more THERE are five States in the Union strong and powerful, its muscles more fully developed, and he will answer, "I use that arm constantly in hammering the which now prohibit the manufacture and iron." Ask the observant teacher why the latter part of his term of five months, stands a chance of being increased ere and he, too, will say, the minds of my long as five other States will vote on the pupils are more active now because of the continued use of them has determined the blood to the brain.

Again, why is it that continued exer-tion in one direction, using only one member of the body, produces over development of that limb and a relative decline in the other members? Manifestly, the blood, the mason and mechanic of the body, is using more of his energy and sengers from Los Angelos hy either steamer material in one direction. If this course were pursued, we would have more thorough scholars, and fewer illiterates in Kentucky. We do not mean to say that no development of the mind should be begun until a child is eight years old, but we do mean to say that mothers should not expect the pubtion of a class in mathematics, if he is at home. Mammas, who seem disposed to shirk their responsibilities and saddle their troubles on the public school teachers by sending the children to school just to get rid of them, should cease to growl when their darlings stand corrected.

Hocking Vailey Coal Operators. CLEVELAND, O., March 21.—The coal operators of the Pittsburg and Hocking valley districts, who are in conference there, reported a trude of 2,000,000 tons of soft coal distributed from Lake Erie points. They have agreed upon a defferential rate of twenty-five cents, the Pittsburg coal to seil that much higher, provided the railways will equalize tarilfs. A committee was appointed to labor with the railway companies. Last year Hocking valley averaged about \$1.65 free on board. It is proposed to make it \$2.15 or \$2.25 this season. The operators claim that the railways, making the interstate commerce law an excuse, propose to take in freight all the advance in coal the improved market will stand, while this conference inserts an equitabie division between producer, transporter and seller. The prospect is that consumers in the northwest will have to pay \$1 a ton above last year's prices.

Smallpox in Los Angelos.

NEW YORK, March 21.—A dispatch from San Francisco to the Herald quotes Dr. Simpson, of the state board of health, who has just returned from Los Angelos, as saying that the situation there in regard to the smallpox scourge is serious, and likely to grow worse. Four weeks ago there was but a single case, which undoubtedly came from Mexico, but between now and then the number is admitted to have increased to forty, and there have been several deaths. At present there are thirteen patients in the hospital and fifteen houses under quarantine. No cases have occurred among tourists so far, the local population being the sufferers. Cases are also reported in adjoining towns. It is the intention of the state board to place inspectors at different stations so that pas-

Faint Saw Mill Explosion.

VAN WERT, O., March 21.—The boiler in O. H. Peassier's saw mill exploded Friday and killed two persons. There was a strike were getting out lumber to fill a contract. The mill is now aimost a total wreck. The hands were loading a car, and escaped injury, but Sam Miller, a stave-bolt maker, and Frank Burtsfield, a school teacher, were in the building and were instantly killed. The top of Miller's head was blown off, and he was mutilated beyond recognition. He leaves a family. Burtsfield's skull was crushed, his arms and legs were broken and he was otherwise mangled.

"I was very fond of her," he said, and thought her as sweet and pretty a woman as I ever saw. But you chaps know I am a little squeamish about some things. An unpleasant thing to look at affects me a great deal, you know. In fact, I have a weakness in that direction, but I can't help it. Say, did any of you chaps ever have a dentist's dam put into your mouth? No? Well, then you can't appreclate my feelings. One day I dropped Into a dentist's office over on State street, and there was my afflanced sitting in the dentist's

chair with the dentist's dam in her mouth. If she had seen me she would have had hysterics. I saw her, and came near having them

"So you don't know what a dentist's dam is! Well, it's a rubber contrivance they put in your mouth. They fasten it under your chin so that it is drawn down over your lips, tongue and gums. They punch a little hole in it, and let the tooth they want to operate on stick up through the hole. The effect on the appearance of the subject is something awful. A woman is never pretty when her mouth is wide open and a dentist's fingers are trying to open it a little wider. But the dam adds a hideousness of which you can form no idea until you see one at its horrid work. One glance at the poor girl with that thing in her mouth took all my love for her away. 'Pon my word, I had to go home that day with a raging headache, all on account of that awful dam, but before night I wrote her a note stating that circumstances over which I had no control compelled me to hreal the engagement. It was a deucedly unpleasant thing

WEEKLY TRADE REVIEW.

SPECIALLY REPORTED TO R. G. DUN & CO., OF NEW YORK.

Interstate Commerce Law Affecting Bustness Unfavorably-Uncertainty in the Stock Market-Advance in Cotton-Busi-

ness Fatlures for the Week. NEW YORK, March 21 .- R. G. Dun & Co. weekly review of trade will say: it is becoming more generally realized that the interstate commerce bill is for the time affecting business unfavorably. In some firanches, as in the movement of dry goods to the West, a temporary flurry of greater activtty results from the desire to transport before the coming change, of rates. But in other trades the uncertainty as to future rates produces almost a paralysis, which is randered more serious in the Iron business by the question whether railway bullding and repairing may not be checked. Many vaguely look for a better understanding of the act when the commissioners are ancounced, but the commissioners will have to swait the decision of many courts before they can know what powers they have. Hence, it can hardly be hoped that uncertainty regarding the effects of the act will moon be removed.

Probably the great Baltimore & Ohlo nerotiations which causes hesitation in the stock market, results from the passage of this act. Mr. Sully does not seem to have sucseeded, but it is generally believed that some important consolidation of interests may be affected which may have important influence on the future value of securitles. Other svents have rather favored prices on the whole. European purchases are again of some magnitude, and the danger of monetery pressure this spring seems less, unless it should some through determined effort of individuals, but the state of bank reserves renders such an operation entirely possible. Foreign exchange has declined; lower prices of products help to make exports large, and the Bank of England gains rapidly in specie.

Wheat declined about three cents, but is now recovering. Corn has fallen about one and a half cents; oif has remained without important change, and lard has declined nearly half a cent. Cotton, on the contrary, has advanced to ten ceuts, with large exports, but it is thought speculative holders have embraced the opportunity to unload. Wheat exports for haif of March have been about 5,700,000 bushels, including flour. But with 72,000,000 bushels surplus from the last crop year, the stock in excess of this year's home demand, and 104,000,000 bushels already exported, still is more than 90,000,000 bushels. An advance in wheat rates to eighteen cents from Minneapolis to Chleago, by the Northwestern pool, instead of seven and one-half cents, threatens to affect Chicago markets.

It is now definitely settled that wool, instead of advancing with foreign prices, has been forced down by the duliness in goods, Stocks on hand are ample, and there is no fear of a short cfip, but growers still hold expectation of higher prices. No change is noted in woolen goods. Distributions of cottons is more active as the change in freight rates draws near, but prices are only firm, and print clothes decfine a shade. A better feeling is noted in boots and shoes, many producers being pressed to meet March de-liveries, and the Massachusetts share steadily increase their supply of labor. India rubber advances, with sales of para at eighty-one cents; the demand for goods is excellent iu New England, but fess satisfactory at the

Another bond call is promised but will hardfy affect the money market, as only \$3,000,000 bonds have been offered under the open calls. Redemption of trade dollars, thus far \$903,983, is far below expectations, indicating that current estimates were exaggerated. Silver receipts at New York rose to 13 per cent, of total custom house receipts, but the government has taken in \$1,700,000 gold and put out \$2,200,000 silver certificates during the past week. The demand for nioney is active, but the supply adequate at Chicago and St. Louis. Rulings of the little husiness was transacted. After 1t o'clock new bank examiner occasion some irritation, as a number of banks report less than the required ratio of reserves. It is presumed, however, that the change in the policy of the department will not be so hasty as to create any disturbance.

The Northwestern Floods.

BISMARCK, Dak., March 21.—The ice gorge at Washimen, sixty miles above, has broken and a terrible flood is coming down the Missouri. The icc at Fort Buford has gone out with a rise of thirty feet, the highest ever known. Mandan is submerged to the second story whillows, and thousands of acres are under water. The flood has already washed away over \$30,000 worth of property and the worst is to come. The Northern Pacific warehouse here has been washed away. Loss \$1,500. The water is now in the second story of houses along the river. Several steamers are frozen in below here and their destruction is inevitable. Some loss of life has occurred and many narrow escapes are reported.

NEW YORK, March 21.—Capt. Toder, of the Italian steamer Eutela, was arrested today in Brooklyn for carrying an excess of passengers. He was taken before United States Commissioner Shields and held for examination. The steamer plies between New York and Genoa. She had on board 526 passengers and the law only allowed her 470.
